Mathematical Analysis Conspect

This directory contains MathAnal **books** by Vinogradov and **conspects in thesis format**.

Thesis format assumes only an ordered list of concepts and theormes introduced with relations between them but without detailed descriptions because the lections and the book by Vinogradov are almost the same. The only thing that may differ is cosmetical changes of proof ordering.

Conspect format is latex.

To compile use script compile.py: pdflatex is used

To commit use ...
